

Cellular Activities with TNF Designations

The entire body is comprised of cells; including bacteria. The TNF family regulates the alignment of all cells including “barriers”

TNF Epigenetic Constituents

For Discussion Purposes

TNF-Alpha

Calcium – threonine – magnesium

Calcium – serine – magnesium

Calcium – cysteine – magnesium

TNF-Beta

Calcium – phenylalanine – magnesium

Calcium – tyrosine – magnesium

Calcium – tryptophan – magnesium

TNF-Gamma

Calcium – serine – zinc

Calcium – cysteine – zinc

Calcium – threonine – zinc
